

Press kit: RapidJelly table lamp

Product

Name: RapidJelly

Category: table lamp

Material: 3D-printed PLA, electronic components

Design: Peter Otto Vosding

Year: 2018

Looking for producer

Description:

RapidJelly is made using **Rapid Prototyping technology** and looks like a **Jelly Fish** swimming in the deep sea.

The name of the product describes the idea behind it perfectly: namely to design a table lamp that can be produced with 3D-printing technologies – in this case a fused filament printer. As material and process allow to create **completely new forms**, we decided to design a partly closed sphere including **lamellae that create a light and shadow pattern** on its surface. This **monobloc lampshade** stands on a little lamp base with a simple led light source.

The two parts are dimensioned and designed to fit into a common 3D printer and can be printed in one process. This opens up the opportunity to start **decentralized production**: customers can purchase and download a 3D-file and print their own lamp at home. The electronics needed can be bought at a local market.

About the studio:

VOSDING Industrial Design is a German design studio based in **Cologne**. The founder Peter Otto Vosding was born in Wiesbaden in 1990. He studied Industrial Design in Darmstadt, Product Design and Process Development in Cologne and went to Ingvar Kamprad Design Centrum (IKDC), Lund University in Sweden for an exchange semester on a scholarship from the IKEA foundation. During his studies he did internships at squareone GmbH in Düsseldorf and at kaschkasch cologne. In 2017 he founded VOSDING Industrial Design and was selected as **German Design Award Newcomer Finalist**.

The studio now works for international clients in the fields of **furniture, lighting and consumer products**.
